

Mobilo / Mobilo Rest

[Ritter® `moving` operator's stools]

healthy working posture

Ritter® Mobilo + Mobilorest - operator's stools for all dental working places:

Ritter® operator's stools for dentists and assistants have a hygienic foot control and 5 dual castors for extra safety. Seat and backrest are individually styled.

The **Mobilo 160** has a flexible support for back and lumbar vertebrae, a swinging seat for dynamic working posture, and a gas spring for height adjustment from 47-60cm.

The **Mobilorest 158** is an "allround" operator's stool. The **Mobilorest 156** is an operator's stool with great variability.

The asymmetrical back support is giving support to the arm of the treating hand leaving space for the other hand.

All Ritter® operator's stools are available in almost every color.

We recommend one of the Ritter upholstery colors.
